

Marat Dospolov

Full Stack / Frontend Tech Leader

Warsaw, Poland · [linkedin.com/in/dospolov](https://www.linkedin.com/in/dospolov) · dospolov.com · marat.dospolov@gmail.com

Profile summary

Full Stack / Frontend Tech Lead with 15+ years experience in JavaScript and team management. My focus is on building user-friendly, high-performance web applications. I lead my remote/distributed/onsite team by example, encouraging best practices in coding and project delivery. Known for pushing the envelope in frontend development, I aim to contribute to projects that value innovation and technical excellence.

Work experience

Simloud - Frontend Tech Lead and UX Lead

October 2019 - Present (4 years 2 months)

Responsibilities:

- Initiated and cultivated the Interface team (FE + UX), steering it through various growth phases.
- Used technologies such as React.js (Next.js, Astro.js, Gatsby.js, Docusaurus; Redux Saga), design systems (TailwindCSS/TailwindUI, Material UI, Ant.design, Shadcn/UI), translating Figma prototypes into dynamic web UI.
- Completed/accompanied features starting from brief ideas, discussions, design creation, stakeholder verification, writing requirements for both FE/BE teams till the full completion and go live.
- Established coding benchmarks, tested code with testing frameworks (Jest/React Testing library/Vitest), undertook rigorous code reviews, and propagated frontend best practices throughout the team.
- Integrated external API with REST/GraphQL endpoints, and cloud services (AWS Cognito, S3; Keycloak)
- Created and maintained style guides, design system, requirements and all other FE/UX documentation

Achievements:

- Launched and maintained website at high level of performance, best practices and seo for both website (98/100/99) and product portal (96/99/92)
- Constantly rewarded as most performant and reliable team in the project
- Advocated for and integrated cutting-edge frontend methodologies, setting Simloud apart in its domain.

N-iX - JavaScript Tech Lead

March 2017 - October 2019 (2 years 8 months)

- Established and scaled the frontend team from the ground up.
- Created and delivered Microfrontends (Module Federation) with React.js with Redux Thunk, Material UI, Ant.design integrated with REST and GraphQL endpoints.
- Utilized AWS SDK: IoT, S3, Cognito/Amplify
- Led the team in developing responsive web applications, ensuring high performance and user-friendliness (98/100 web vitals score).
- Set coding standards, test coverage with Jest, conducted code reviews, and ensured best practices.
- Collaborated with stakeholders and project managers for timely feature delivery.

EPAM Systems - Javascript Tech Leader

June 2014 - March 2017 (2 years 8 months)

Sportcheck SPA project:

Angular.js, meteor.js, gulp, stylus, socket.io, Git, Adobe CQ, REST

Adidas Marketing Portal project:

backbone, marionette, q.js, lodash, grunt, bower, sass, handlebars, jQuery, handsontable.js; REST; Microfrontends

Luxoft - Web developer

June 2011 - June 2014 (3 years 1 month)

JSP, Spring, XML; Backbone.JS, SOAP, RIA.

ISRA group - HTML-coder

June 2009 - March 2011 (1 year 10 months)

Education

Classic Private University (CPU), Ukraine

Bachelor's degree, Information Technology · (September 2018 - June 2022)

Kiev institute of business and technologies (KIBT), Ukraine

Bachelor's Degree, Management · (2012 - 2014)
